

Suggested Year 1 Phonics Plus-aligned decodable text.

Colour coding: book includes **one or some targets**, all targets, or **additional targets**

To help Victorian schools teaching Phonics Plus to spend money wisely when buying decodable books for their Year 1 students, here's a list of books which more or less align with the Phonics Plus sequence from Australian and UK publishers. US English vowels differ from ours, and they spell many words differently, so we suggest considering US books only if you can't find enough suitable Australian or UK ones. Apologies to publishers elsewhere, as right now we don't know much about their books, though the [Aotearoa/NZ Ready To Read books](#) look nice. There is not much information about morphology in this table because the prefixes and suffixes in these books aren't usually listed as targets. Please email info@spelfabet.com.au if you have feedback on this document, or you'd like to browse our North Fitzroy display of decodables (which includes many more books than the ones listed here, but it's generally hard to work out how to dovetail them with the Phonics Plus sequence) and discuss how to get the best value for your decodable dollar.

DRA – Main Fiction	We don’t have the DRA Main Fiction Levels 5-6 books, which seem to target sound-spelling relationships in Year 1 of Phonics Plus, so can’t list specific titles matching each Phonics Plus Set, or check/confirm that specific books provide multiple repetitions of a given sound-spelling relationship, while excluding patterns not yet taught. Level 4 book 1 lists the target ‘ph’ and contains 21 instances of the word ‘dolphin(s)’. Level 4 lists c/cell and g/gem as targets, and the books contain the words ‘gel’, ‘gem’, ‘magic’, ‘cents’, ‘Vincent’, ‘Cecil’ and ‘Pacific’, but no specific book provides high repetition of these targets.																
DRA nonfiction, tales, chapter books																	
All books in Levels 5-6 target all the sound-spelling relationships in that level, but specific books don't give intensive practice of a particular target. These books could therefore be used for revision/consolidation of targets once they have been taught, or extension.
